

Improving Women's Health is a Matter of the Heart

A life-saving campaign to B.E.A.T. women's cardiovascular disease and bring hope to rural communities in Southeast Haiti.

70% of all Haitian women die from heart disease

The Michigan United Methodist churches have helped moms and newborns in Mizak Haiti to "Start Right" through prenatal care. "Heart2Heart" builds upon our shared commitment to gender equity and women's health by putting the tools of heart health in their hands.

HYPERTENSIVE DISORDER (HPD) is the leading risk factor

- Haiti is 7th globally for HPD
- #1 in the Caribbean for the highest stroke mortality
- #1 cause of maternal mortality, stillbirths and low weight births
- 49% of Haitian women affected
- affects Haitians at a much younger age

This **Giving Tuesday, November 29**, HAPI launches our "Heart2Heart" campaign to B.E.A.T. women's heart disease. Give with your HEART. A gift of any amount supports the following:

BASIC TRAINING – providers

EDUCATION – prevention

AWARENESS – outreach

TREATMENT – clinical care

HAPI is an EngageMI ministry partner. Lane 4, Advance #3020490
